

VANSHIT MEHTA

Backend Engineer • Java • Spring Boot • Distributed Systems

Mumbai, India | +91-9518745967 | vanshitalpeshmehta4@gmail.com | linkedin.com/in/vanshkmehta | github.com/vanshkmehta

SUMMARY

Backend engineer with **2.5+ years** designing distributed infrastructure systems at Jio Platforms (India's largest digital platform, 450M+ users). Designed asynchronous provisioning pipelines, quota validation frameworks, and disaster-recovery workflows for hybrid-cloud infrastructure serving **100K+ enterprise users**. Currently building an AI-powered B2B SaaS solo with **Spring AI** and **Claude API**, owning every architectural decision end to end.

EXPERIENCE

Jio Platforms Limited (Jio Cloud / India AI) – Software Development Engineer I Dec 2023 – Present
Mumbai, Maharashtra

- Designed and implemented an **asynchronous, dynamic resource quota validation framework** for Jio Cloud supporting ROS, HCI, GCP, and internal IaaS providers – serving **100K+ enterprise users** across multi-cloud infrastructure
- Engineered a **centralized quota validation engine** integrated across order types (VMs, Block Storage, Security Groups, HSM) – **reduced post-provisioning failure orders by 40%** by catching invalid requests at source
- Built a **global capacity validation system** performing logical and physical quota checks before provisioning – eliminated resource over-commitment failures across the cloud platform
- Architected an **async order-processing pipeline on RabbitMQ**, enabling non-blocking provisioning workflows for compute, storage, and networking services across hybrid-cloud infrastructure
- Developed an **OPS-focused logging and diagnostics framework** with end-to-end traceability for provisioning failures – **reduced production incident closure time by 60%**
- Core contributor to the **Disaster Recovery feature**: enhanced RESTful APIs and built complex asynchronous replication workflows in collaboration with cross-functional infrastructure teams
- Built a **scheduled PostgreSQL–Oracle sync utility** maintaining data consistency between order modules (Postgres) and provisioning systems (Oracle) via cross-database state reconciliation

Tech: Java 17, Spring Boot, Spring MVC, PostgreSQL, Oracle, RabbitMQ, Redis, Hibernate/JPA, REST APIs, Maven, Git, Linux

PROJECTS

B2B Sales Intelligence Platform 2026 – in development
AI-powered SaaS delivering automated company intelligence reports to sales professionals via Telegram – built solo.

- Architected backend with **Spring Boot, PostgreSQL, Redis**, and Quartz Scheduler for automated report generation and delivery
- Integrated **Claude API (Anthropic) via Spring AI** to generate intelligence reports covering M&A activity, hiring trends, and financial analysis
- Built a multi-source news aggregation pipeline (**NewsAPI + Google RSS**) with deduplication, relevance scoring, and AI filtering layers
- Implemented **Telegram Bot API** integration for user onboarding, company watchlist management, and report delivery

Tech: Java 17, Spring Boot, Spring AI, Claude API, PostgreSQL, Redis, Quartz Scheduler, Telegram Bot API, Docker

Kavach – Women's Safety App Jan 2023

- Developed an Android SOS-safety app with **Java, XML, Firebase** for real-time alerts, location broadcasting, and emergency response
- Awarded Gold Medal at Anveshana 2023**; shortlisted for the Government of India Tech Innovation Awards

TECHNICAL SKILLS

Languages	Java (primary), SQL
Frameworks	Spring Boot, Spring MVC, Spring Data JPA, Spring AI, Hibernate
Data & Messaging	PostgreSQL, Oracle, Redis, RabbitMQ
AI Engineering	Claude API (Anthropic), Spring AI, Prompt Engineering
Tools	Git, Maven, Docker, Kubernetes, Postman, Linux, IntelliJ IDEA
Concepts	Distributed Systems, Microservices, REST API Design, Asynchronous Processing, Event-Driven Architecture

EDUCATION & CERTIFICATIONS

B.E. in Computer Science, Honours in Data Science – PVGCOE, Nashik Jun 2019 – Aug 2023
Pune Vidhyarthi Griha's College of Engineering | CGPA: 8.60

Certified Kubernetes Application Developer (CKAD) Coursera
